KUNSTSTOFF INSTITUT LÜDENSCHEID

... is to set up a new training and education centre for Brasilian plastics processors. This means in detail:

- Building up an education and training centre for the plastics industry in the region of São Paulo
- Practical Education of process operators according to the official german education title "Verfahrensmechaniker Kunststoff/Kautschuk" (=process operator for plastics and rubber)
- Long-term saving of experts and their knowledge for the plastics industry (sampling, production, process optimization, maintenance, quality assurance)
- Long-term support by german experts to ensure up-to-date knowledge for brasilian trainers (continuously teach the teacher)

KUNSTSTOFF INSTITUT LÜDENSCHEID

- We have very good experiences with an institute, which has private character (in Germany GmbH) and has to finance itself.
- A proposal for a founded community project will be released by one German Institution together with it's Brasilian partner:

Plastics Institute of Lüdenscheid

Chamber of foreign trade of São Paulo

П

How we want to do...

- Room for theoretical training and practical exercises will be needed.
- Two identical machine configurations in São Paulo and in Luedenscheid ensure quick technological exchange even "live" during a running training course

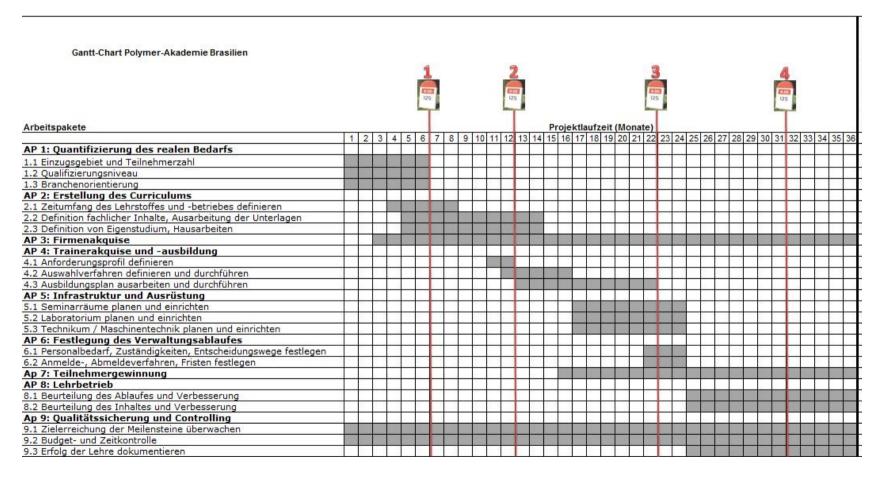

Our training facilities in our last foundation in the South West of Germany

П

For setting up the centre, a detailed workplan has been created,

as well as ..
