

PP regrind natural color
TYPE: PAPADATOS-PP-C3021

Description

C3021 is PP regrind ex clean post industrial origin PP copolymer & homopolymer scrap.

All material is one batch, homogenized.

Features

Use: suitable for extrusion or injection applications

Color: natural-transparent

Packaging

Big-Bag on pallet

Properties

Melt Flow Index (MFI) : 4-6 g/10 min, (230*/2.16 kg)

Density : 0,933 g/cm³ (ISO 1183-1A)

Chemical composition Filler: not added

Please note that the property details shown above are typical for the material type and obtained by averaging lab data from several samples taken during production. Users should confirm results by their own testing.
