
PP agglomerate injection grade white colour

TYPE:
PAPADATOS-PP-C3037

Description

PP agglomerate is ex clean post industrial origin PP copolymer scrap.

All material is one batch, homogenised.

Features

Use: injection grade
Color: white

Packaging

Big-Bag on pallet

Properties

Melt Flow Index (MFI) : 20-25 g/10 min, (230*/2.16 kg)

Density 0,933 g/cm³ (ISO 1183-1A)

Chemical composition Filler: not added

Please note that the property details shown above are typical for the material type and obtained by averaging lab data from several samples taken during production. Users should confirm results by their own testing.
