

Technical Data Sheet

Test Report N. 25/091 of 31/07/2025

Off grade clear EVA

Art.: EVA010

Our EVA010 is an eco-friendly solution for industrial applications that require flexible materials with a low melting point, suitable for extrusion. It is a granular ethylene-vinyl acetate (EVA) copolymer, suitable for standard extrusion lines, with good low-temperature sealing properties and compatibility with other polymers for co-extrusion.

Key Features

- Off grade
- Color: clear
- Chemical base: Ethylene-vinyl acetate copolymer (27÷28% VA)
- Process: Extrusion
- MFR (190°C/2.16 kg): 3,7 g/10 min
- Melting point: 69,5°C
- Freezing point: 44,8°C
- Packaging: 1100 kg big bags
- Availability: Regular
