

HIGH DENSITY POLYETHYLENE REGRANULATE

HUREPRO HDPE 2011 730V

COMPOSITION:

The **HUREPRO HDPE 2011 730V** polyethylene regranulate is a recycled HDPE and LDPE material. The coloring is achieved by using masterbatch.

RECOMMENDED AREAS OF APPLICATION:

We recommend the **HUREPRO HDPE 2011 730V** regranulate to be used for extrusion of various products. Application examples: protection tubes, sheets, etc.

PHYSICAL PROPERTIES:

	Typical value*	Unit	Standard
Melt index 190°C / 5,00 kg	0,6 – 2,5	g/10min	ISO 1133
Hardness (Shore D)	59 – 63	–	ISO 868 (D)
Color	black	–	–

*: The values given are indicative.

PACKAGING:

The material is sold in big bags placed on pallets.

QUALITY AND ENVIRONMENTAL MANAGEMENT:

Our company is certified to the ISO 9001:2015 quality management and the ISO 14001:2015 environmental management system.

Date of release: June 2020
