

Material & Quantity

|                |                                                              |
|----------------|--------------------------------------------------------------|
| Material       | ABS                                                          |
| Form           | Resin / Pellets                                              |
| Source         | Post-consumer                                                |
| Grade          | Injection Molding                                            |
| Total Quantity | 100 mt                                                       |
| Color          | Gray                                                         |
| Application    | Electronics , Hangers , Spools , suitcase , Furniture , ETC. |

Specs & Testing

|                                |                            |
|--------------------------------|----------------------------|
| Melt Flow Index                | 30 g/10min                 |
| Density/Specific Gravity       | 1.07-1.10g/cm <sup>3</sup> |
| Toughness/Impact (Izod)        | 10-11 KJ/m <sup>2</sup>    |
| Tensile Elongation at Break    | 15.00 %                    |
| Tensile Strength               | /                          |
| Flexural Strength              | /                          |
| Flexural Modulus of Elasticity | /                          |
