
Introducing VALO-PLA/WOOD

Sustainable Excellence for Premium Packaging

Where Excellence Meets Responsibility

In the world of luxury, every detail matters. Packaging is not just a container:

👉 It's the **first expression** of your brand identity.

👉 It must **elevate the product** while reflecting core values: aesthetics, sustainability, and innovation.

The Limits of Traditional Plastic

- Industrial and uninspiring appearance
- Requires costly surface treatments
- Misaligned with premium brands' CSR commitments

✗ Can a truly exceptional product be presented in packaging that doesn't share its values?

VALO-PLA/WOOD: A Game-Changing Alternative

A **bio-based and biodegradable** thermoforming material that redefines premium packaging:

- ✨ **Natural beauty** with no need for extra finishing
 - 🛡️ **Technical performance** for precise and protective thermoforming
 - 💰 **Economic efficiency** through streamlined production
 - 🌍 **Lower environmental impact**: no microplastics, compostable
-

A New Standard for Visionary Brands

VALO-PLA/WOOD represents the new generation of responsible materials:

Value	Contribution
 Sustainability	Reduced carbon footprint, biodegradable
 Aesthetics	Naturally premium texture and finish
 Technical Strength	Durability, formability, product protection

Value	Contribution
 Cost-Efficiency	Fewer treatments, faster cycles

A New Era Without Compromise

The days of choosing between beauty, performance, and sustainability are over. With VALO-PLA/WOOD, you combine **design, responsibility, and efficiency** in one material.

Tailored Support for a Smooth Transition

Our team will support you through every step of switching to bio-based thermoforming:

- Feasibility studies
 - Prototyping
 - Integration into your production lines
-

About VALO-PLA/WOOD

We deliver **premium, sustainable packaging solutions** as alternatives to conventional plastics:

-  Enabling the circular economy
-  Eliminating plastic pollution
-  Helping brands significantly lower their carbon footprint
