

POLYEXIM

At Polyexim, we are a player in the dynamic world of plastic raw materials. Our commitment to excellence and innovation has propelled us to the forefront of the industry. In this presentation, we will provide an insightful overview of both our company and the plastic raw materials industry as a whole.

Our Journey

Founded in 2009, our company has been active in the plastic raw material industry for over one decade. From humble beginnings as a small-scale operation, we have grown to become one of the bigger trading companies of high-quality plastic raw materials in the Netherlands.

Over the years, we have achieved many significant milestones, including expanding our network and establishing a reputation for excellence in customer service. We have also invested heavily in research and development, allowing us to stay ahead of the curve and provide our customers with solutions that meet their evolving needs.

Our Range of Products

We are especially focused and specialized in recycled materials. Besides this, we also trade in prime virgin. Our product offerings include regranulate, regrind, prime virgin, off-spec, compound, and post-industrial & post-consumer scrap.

We offer a diverse range of plastic raw materials that cater to various industries such as automotive, construction, and packaging. Our products include HDPE LDPE, PP, PS, ABS, SBS, PA6, PA 6.6, POM, PBT, and many more. Each material has its unique properties and benefits, making them suitable for different applications.

Our Commitment to Quality

At our company, we understand the importance of quality control in the plastic raw material industry. We have implemented strict measures to ensure that our products meet the highest standards of quality. Our partners conduct rigorous testing and analysis at every stage of production to ensure that the materials are free from defects and contaminants.

In addition to internal quality control processes, our partners hold several certifications that demonstrate their commitment to quality. These include ISO 9001:2015, which outlines the requirements for a quality management system, and ISO 14001:2015, which focuses on environmental management. By adhering to these standards, we are able to provide our customers with the assurance that they are receiving the best possible products.

Our Competitive Edge

At Polyexim, we pride ourselves on the distinctive qualities that set us apart in the industry. We have established a strong presence not only locally but also on a global scale. Our network and international partnerships expand our reach, facilitating access to a wider range of resources and markets. We uphold rigorous quality standards at every stage of our operations. Our dedication to quality control ensures that our materials and services consistently meet or exceed industry benchmarks.

Our customers are at the heart of everything we do. We cultivate strong relationships by listening to their needs, offering tailored solutions, and delivering exceptional service. We recognize that time is of the essence for our clients. Our logistics and supply chain management are finely tuned to ensure that materials arrive precisely when needed, reducing downtime and optimizing operations.

Our Partners

At Polyexim, we take immense pride in our extensive network of partnerships that span not only across Europe but also beyond its borders. These strategic alliances are a testament to our commitment to delivering excellence in every aspect of our operations.

Together with our partners, we strive for mutual success. We understand that their dedication to reliability aligns with our commitment to delivering quality to our clients.

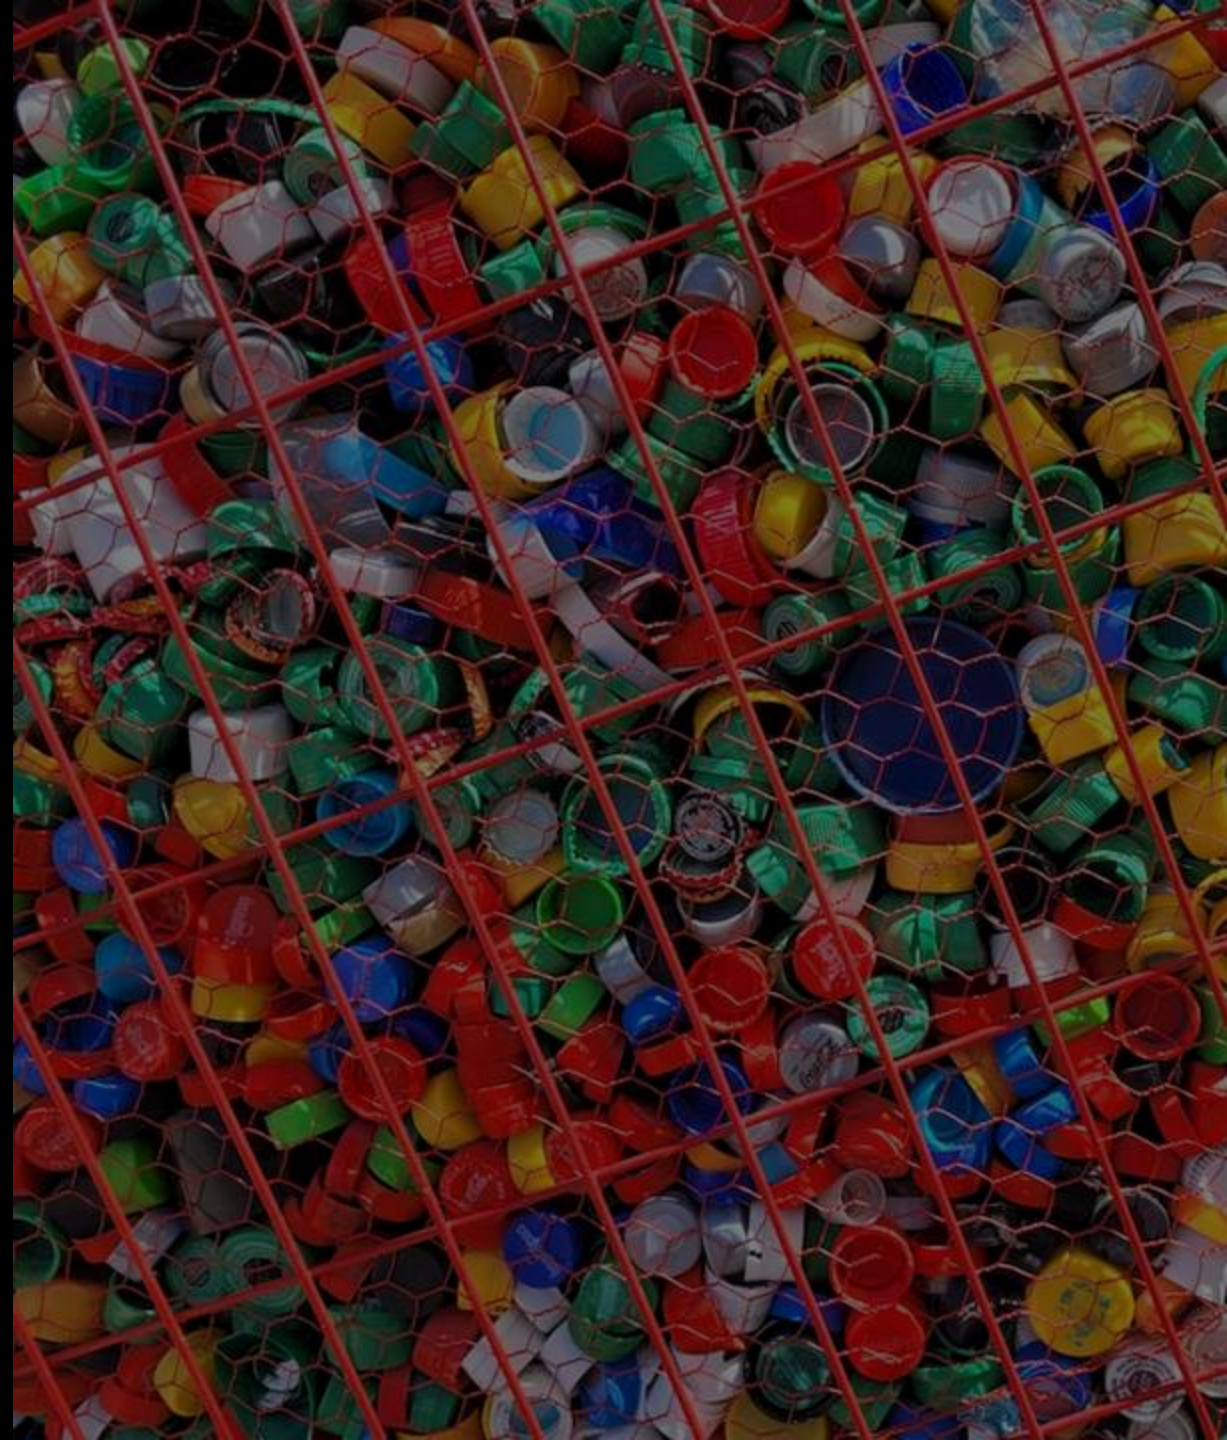

Our partnerships, whether in sourcing, supply, or logistics, are not merely transactional but built on years of collaboration. These enduring relationships are a testament to the trust and confidence we share with our partners.

Our projects

At Polyexim, we have supplied high-quality plastic raw materials for diverse projects:

- 1. Packaging Materials:** Enhancing packaging solutions.
- 2. Construction & Building:** Contributing to sustainable structures.
- 3. Automotive Parts:** Elevating vehicle safety and efficiency.
- 4. Electronics Components:** Ensuring reliability in electronics.
- 5. Industrial Equipment:** Improving industrial processes.

Our commitment to excellence is evident in every sector we serve.

Thank You
